

NK WINDOWS
Made for Living

**Discover the
difference**

WARMER | SAFER | QUIETER

Creating warmer, safer and quieter homes for kiwis – made for living

At NK Windows our mission is to help New Zealanders make better homes. Plain and simple. By designing, manufacturing, and installing premium uPVC windows and doors, living becomes more comfortable, more economical, and safer.

Established way back in 2000, we have grown into one of the most experienced uPVC window and door providers nationwide. Our friendly and knowledgeable team work closely with local builders and architects to help you achieve the vision you have for your home.

We will oversee every aspect of your project, leaving nothing to chance. We promise to support and guide you to create spaces that resonate with warmth, health, and comfort – spaces made for living.

Industry leaders

Our proven track record gives our customers peace of mind

uPVC expertise

Whatever your needs, our experienced team can help find a solution

Focused on service

Outstanding customer service puts you at the centre of the project

Local knowledge

We understand the unique climate and environmental needs of New Zealand homes

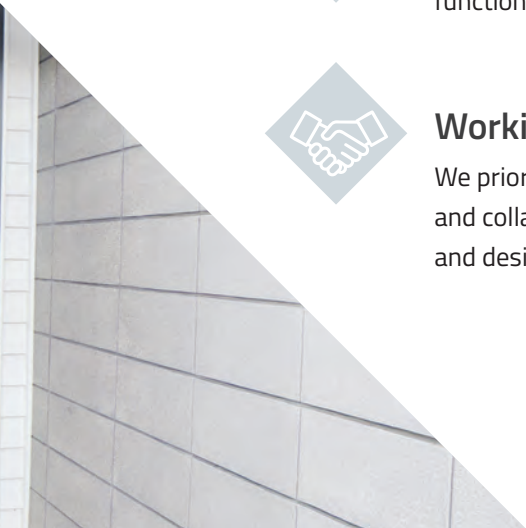

German precision

Precision and innovation offers superior functionality, efficiency and durability

Working partnerships

We prioritise clear communication and collaboration with your building and design partners

Thinking green? Think uPVC

Our commitment to building better quality homes includes benefits for the planet too. Our uPVC windows are way above the H1 building code for windows and doors. No matter where you live in New Zealand, by opting for our uPVC windows, you're taking a stand against deforestation, habitat disruption, and excessive energy usage.

Value for money	★★★★★	★★★★★★

- **Recyclable** – uPVC windows are almost 100% recyclable. Opting for recycled window frames not only conserves resources but also minimises disposal costs.
- **Energy efficient** – reduced heat loss through our superior insulation can lower your power bills.
- **Exceptional durability** – designed to withstand New Zealand’s high UV conditions
- **No emissions or damaging chemicals** – our uPVC profiles contain no environmentally harmful chemicals, emit no gases, and offer easy cleaning, and a non-porous surface.
- **No deforestation** – making uPVC windows and doors does not contribute to deforestation or habitat destruction.

Steffen

"We want to say a big THANK YOU to all involved with installing our new windows and doors, from the quotation team and the production team to the installation team, all did an exceptional job and the result is stunning. We really enjoy the warmth and a lot more quiet time from all the road noise on State Highway 1."

Philip

"Our immediate thought was 'our house no longer feels like it's leaking heat'. Exceptional products that significantly outperform our 15-year-old double-glazed aluminium windows. No more condensation. Tilt & Turn windows and doors means we can securely ventilate ... and no longer run the risk of kids hitting their heads on an open window!"

Customer stories

Amanda

"We are so happy to have replaced every window and door in our home with NK. The process was smooth and (due to funds) we had to wait till our EQC repairs were completed before install. It was quick, clean, quality workmanship which occurred ahead of schedule!"

Roslyn

"I cannot thank Martin and his team at NK Windows enough for the exemplar service they have provided. Right from the beginning, NK Windows showed exceptional professionalism through ongoing communication of updates, scheduling of work and guidance on how to prepare for installation. The windows look absolutely amazing and have transformed and modernised my 1950's home."

Kurt

"Just had NK come out and quote for our windows and doors and well itemised and understandable. And quite surprisingly less than what I thought it would be... Really will increase the value of your house as well. Take your time in doing the window layouts. Visit their showroom. Get double advice from them. I got them out again to triple check. And I glad I did as the last changes I'm very happy with."
